

| Model Name                    | FQR7204                             |
|-------------------------------|-------------------------------------|
| Network Processor             | MIPS64 Advanced Dual-Core Processor |
| Flash                         | 32MB                                |
| DRAM                          | 1G                                  |
| WAN Port                      | 8(Gigabit)                          |
| DMZ Port                      | 1 (WAN8/DMZ)                        |
| LAN Port                      | 5(Gigabit)                          |
| Session                       | 300,000                             |
| NAT Throughput                | 2Gbps                               |
| Network Detection & Fail Over | Yes                                 |
| Load Balance Mode             | Session/Advanced Session/IP         |
| Strategic & Virtual Routing   | Yes                                 |
| Firewall                      | Yes                                 |
| Recommended PC Number         | 750~1,000                           |
| Size                          | 440x255x44mm                        |
