Light up infinite innovation.

Experience the Feeling you never had

1. This LED computer reading light is mainly designed for using the computer at night or at the place with insufficient illumination. It is a handy device that may substitute a lamp (40cm in height, the brightness can reach 470 Lux with low power consumption of 3 watts). To help you save the desk space.

*Adolescent

2. To satisfy the desire of mobile illumination for reading, the outer shell designed with the colorful aluminum alloys materials, which demonstrating various metallic styles and is your best choice for your work and entertainment.

3. Glare-preventing design protects your eyes:

□ Glare-preventing optical lens is treated by diamond sculpture, in this way the angle of travel path of light is changed. Direct glare is prevented as to avoid intense light which shines on users eyes and reduces their visual ability °

4. The optical lens has fingerprint-resistant ability so that no residual marks can be found on its surface.

□ The optical lens is treated by fingerprint-resistant technology so that fingerprint will not appear on its surface and will definitely not affect output of light, reality, and effect of picture. This is truly a breakthrough technology of application °

5. On/Off switch

□ Location of the switch can be seen easily. Turn it off when leaving to reduce carbon emission and lessen the problem of global warming) °

6. Aluminum alloy material- transmitting heat faster:

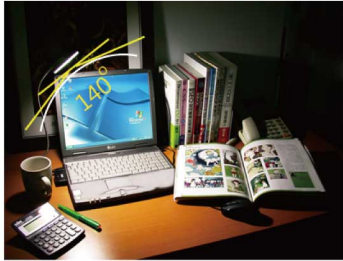

7. Bendable metal tube:

□ Its metal tube with high operability enables you to adjust whatever locations to conform your reading environment °

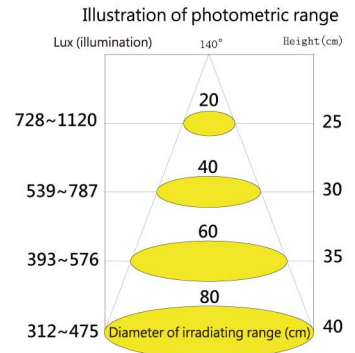

8. Wide-angle: 140° of projection angle:

□ With 140° of projection angle, computer operation and reading can be taken on simultaneously, thus satisfy various lighting requirements °

9: Good color-rendering without discoloration:

□ Its high quality LED lighting and function for reading purpose meets requirements of computer users and professionals: Color-rendering index Ra > 75, color temperature: 6000k, illumination over 470 Lux at 40 cm of height °

10. Compact structure and smart fold:

□ It is only 8.8 cm wide. With its flat-round shape shell made out of aluminum alloy, it has ability to quickly conduct and release heat. The shell is combined with the shaping curve tube which has high bendability. It has metallic texture, fashionable style, and its surface is treated by special oxidation process. This shell can contain the tube into a round shape with no bother, and it is flexible as to occupy very little space °

11. Personality, fashion, and attitude:

□ Your style, your color and modeling are attitude and life style decided by yourself °

LED lamp has a lifetime as long as 30,000 hours without necessity of changing bulb. Such reduced frequency in changing bulb is what we meant attitude °

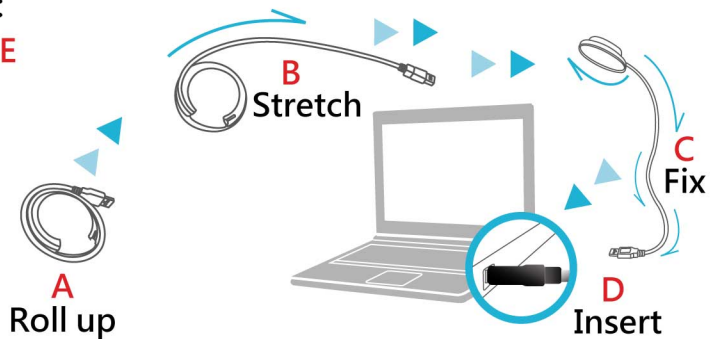

12. Notebook computer method of use:

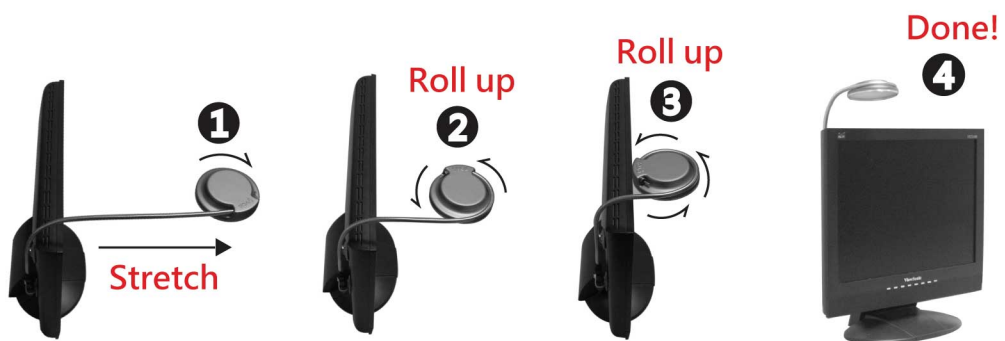

The profile of the product:

Stretch order: **A > B > C > D > E**

Collect order: **B > A**

13. How to extend the Reading Lamp over a LCD Monitor:

13.How to install the fixed rack:

14.Specifications:

- USA.CREE LED chip °
- Power consumption ≤ 3 watt °
- Hight Power LED °
- Color temperature: 6000k \pm 300k °
- Color-rendering: ≥ 75 Ra °
- Total luminous flux: 200 lumens °
- Optical angle: 140° °
- Reflector °
- Aluminumalloy Material °
- Optical lens °
- Operational setting: -10°C~40°C °
- Surface temperature: 0-48°C °
- Terminal type: USB plug °
- On/Off switch °
- Voltage: 5Vdc/500mA~1000mA ° (USB2.0&USB3.0)
- PE film coated with metal hose °
- The anode surface treatment °
- Meets CE/RoHs standards °
- Weight: 92 gram °
- Dimensions: $\psi 79 \times 19 \times 460$ mm °
- Made In Taiwan °
- One year warranty °

15.Package contents:

16.Package type:

Frontside

Backside

17.Package:

A.24pcs/box

box size: 39cm L x 21cm W x 25 cm H
(G.W.: 5 kgs)

B.96pcs/ctn 40cm x 43cm x 53cm
(G.W.: 21 kgs)

18.Video player:
