iReminder SB10

Loss Prevention for Your BLE iPhone/iPad With
"FINDME" Function and More.....

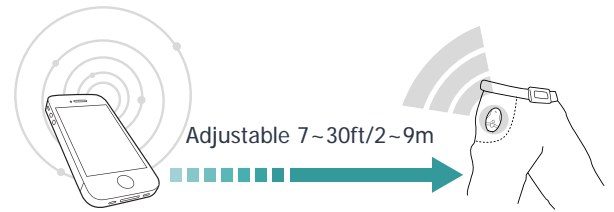

**Bluetooth 4.0
BLE**

The iReminder SB10 is the most effective loss prevention solution for your BLE iPhone/iPad, ex. iPhone 4S/New iPad/iPhone5/iPad mini. It is an "electronic leash" that notifies you with an audible alarm whenever your BLE iPhone/iPad leaves your vicinity (Out-of-Range) or whenever you leave your BLE iPhone/iPad behind. The iReminder SB10 also assists you in locating your misplaced BLE devices within a 98ft/30m' radius (FindMe function).

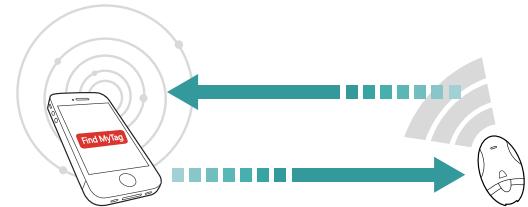

Loss Prevention - Warning alarm prevents loss of BLE iPhone/iPad, keys and more..

When you reach 7~30 feet / 2~9 meters from the iPhone, the Reminder will begin to beep. If you move back into range, the alarm will cease.

Two-Way FindME - iReminder and BLE iPhone/iPad can instantly find each other

You can search for a misplaced BLE iPhone/iPad using the iReminder, but only if the iReminder is within a 98ft/30m radius - conversely, you can also search for your iReminder with your BLE iPhone/iPad.

Notification of incoming calls - on your BLE iPhone

When someone calls your phone, the iReminder SB10 starts beeping to remind you.

Map Location - Locating your car at parking lot

Automatic set "place mark pin" when you leave your car.

Supports Multiple Devices - With free HiProx Multi App

iReminder allows you to add up to 4 Tags, so you can keep track of your most valued items, such as a key, kid, purse or car.
